SUMMARY

I am an experienced full-stack software engineer with about 5 years of experience proficient in React and C#. I have successfully rewritten legacy systems, utilized microservices architecture with gRPC and protocol buffers, and managed private npm packages for exporting spreadsheets from the user interface. With expertise in SQL Server to MySQL conversion, UI design, and Next.js integration, I am committed to delivering exceptional results and driving innovation in software development.

EXPERIENCE

SOFTWARE ENGINEER 3

Ensurem

03/2021 - Present

- Created TypeScript interfaces for props and developed demo sites using Next.js in TypeScript.
- Refactored TypeScript and encapsulated reusable components into an NPM package that is now being utilized in multiple applications.
- Contributed to the company's success by writing code that provided financial evaluations, ultimately leading to increased funding.
- Adhered to SOLID principles, followed clean code practices, and implemented test-driven development standards.
- Trained junior developers in React using TypeScript and created documentation on Confluence to detail how specific parts of the system worked.

CEO/FOUNDER(PART-TIME)

Qamar Labs

06/2022 - Present

- As the CEO of my consulting company, I was responsible for overseeing all aspects of the company's operations, from managing finances and budgets to overseeing client relationships and driving revenue growth.
- Used exceptional interpersonal skills to build and maintain strong relationships with clients, partners, and stakeholders, which was instrumental in securing new business and driving the company's expansion.
- Helped clients achieve their business objectives through effective and innovative consulting solutions.

SOFTWARE ENGINEER

Kikoda Software Consulting

10/2018-03/2021

- Rewritten legacy system for a client using angular on the client side, and node on the server side.
- The server-side configuration is made up of microservices communicating internally with gRPC and protocol buffers.
- Also managed private npm packages responsible for interesting features such as exporting spreadsheets using data from the user interface.
- Converted SQL server stored procedures to MySQL stored procedures, and also did database administrator related tasks such as cleanup scripts and fixing bugs within stored procedures.
